

„Seamless Collaboration in Logistics“

Cross-company collaboration, seamlessly with catkin

catkin – the universal portal for order processing

The **logistics platform 4.0 catkin** is the universal portal for order processing with service providers and customers as well as for the management of mobile personnel. catkin is offered as a "Software as a Service" solution, so that almost every process structure can be mapped online.

The **catkin SmartApp** supports the creation of transparent processes in the logistics chain. Furthermore, catkin connects all participants of a supply chain - thus a cooperative network of specialized companies is created, which exchange information in real-time.

Web & App

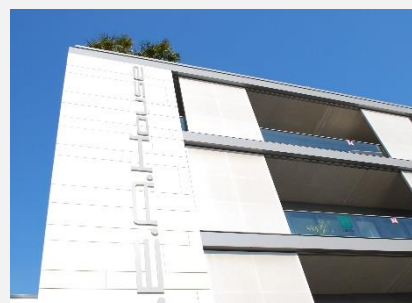

- ✓ Access via a standard browser
- ✓ No installation required
- ✓ catkin as customer and service provider portal at the same time
- ✓ Reporting of real-time data via App
- ✓ Industry-specific apps (freights forwarding, technical weighing analysis, working time management for mobile staff)

Features

- ✓ Easy cooperation with service partners (client and/or contractor)
- ✓ Fast integration into in-house software through **highly flexible API**
- ✓ Hosted in a **German data center** according to industrial standards
- ✓ Horizontal integration of participants – **Logistics 4.0**
- ✓ Used by approx. 130 companies
- ✓ Fair, usage-based pricing model
- ✓ Patented technology

The catkin GmbH

We have been developing and implementing customized communication solutions in the B2B sector since 2013. With our catkin communication portal we mainly support industrial and transport companies. With the help of our modern software technologies, our customers especially design their logistics, but also other business areas, in a transparent and secure way.
